

1 ABSTRACT OF THE DISCLOSURE

2 The invention is a pre-scented and custom treated card
3 for use with a vacuum cleaner having an intake nozzle, a
4 receptacle and a blower that creates a flow from the nozzle
5 to the receptacle so as to carry dirt from the nozzle into
6 the receptacle. The pre-scented and custom scented card
7 includes a card and oil containing a fragrance, an anti-
8 bacterial agent and/or an odor eliminator. The card is
9 formed from a material that is capable of absorbing a
10 fragrance. The oil containing the fragrance, the anti-
11 bacterial eliminator and/or the odor eliminator are disposed
12 on the card. The card may be cut into a plurality of strips
13 that are then inserted into the receptacle through the
14 opening of the bag or receptacle.
